

### DOCUMENT DATE

April 2025

### ASSUMED MODIFICATION DATE

Quarter 2/2025

### CODES/MODELS INVOLVED

All standard products with Blupura-branded manuals

### DETAILS

Digitalization of product manuals

Dear Partner,

To simplify your work and enhance the user experience of our products, we are pleased to introduce a new management system for our manuals, designed to be more practical and sustainable.

From today, the manuals for Blupura-branded products will become completely digital, starting with Rebel as a pilot project. This will bring numerous benefits, including:

- **Immediate access:** easily consult the manual from any device.
- **Sustainability:** elimination of paper, thereby reducing environmental impact.
- **Enhanced convenience:** all manuals at your fingertips, without the risk of misplacement.
- **A single multilingual manual:** one document featuring Italian, English, German, French, and Spanish.

Furthermore, the new manuals will be divided as follows:

#### Installer manual

Intended for technicians, with detailed instructions for installation and maintenance.

🔍 Where to find it? By scanning the QR code printed on the machine's packaging

#### User manual

Designed for daily users, with guidance on operation and the interface.

🔍 Where to find it? By scanning the QR code on the paper flyer inside the packaging.

**Rebel** will be the first product to feature the new digital manuals. Subsequently, all Blupura-branded products will transition to digital manuals.

**Important:** this new management will currently apply only to standard Blupura-branded product manuals.

Thank you for your cooperation,

*The Blupura Team*
